PLATINUM DISTORTION

USER MANUAL

## **About the Lee Jackson Platinum Distortion**

I wanted the Platinum Distortion to be the next step in distortion pedals, and be the next iconic and ground breaking pedal

I feel we have done it with the Platinum Distortion, creating features not seen before, and a sound that is just amazing.

I thank you for being a part of the next generation of iconic artists, that together will create the new tonal frontier.

The Platinum Distortion pedals are built with the best parts available and you can hear it. From the warmest distortion to the heaviest metal. We know you will be extremely excited every time you turn it on and play through it.

## FRONT PANEL CONTROLS

- 1) **INPUT** instrument jack (Right side)
- 2) **OUTPUT** jack (Left side)
- 3) **TONE** control
- 4) **TONE SWITCH**
- 5) **GAIN** control
- 6) **DISTORTION SWITCH**
- 7) **POWER** connector - 2.1 mm Center Tip Ground - +9 vdc
- 8) **LED** light
- 9) **FOOTSWITCH** switch

**INPUT JACK** provides input to the Platinum Distortion amplifier.

**OUTPUT JACK** provides output to an effects chain or amplifier.

**TONE** adjusts the overall frequency response of the pedal.

In the middle it is close to a flat response, turning it left increases highs, And turning it right increases low's.

**TONE SWITCH** turns the tone control on and off,

Every pedal that has a tone circuit, limits some of the frequencies when used.

By bypasses it you can allow the full frequency of your instrument to pass through.

**GAIN** adjusts the signal strength coming out of the instrument, and going into the first Distortion stage.

**DISTORTION SWITCH** Has three positions, in the middle it is off and allows the second distortion stage to operate cleaner.

Position 1 and Position 2 are completely different styles of distortion, and by activating them you can get sounds from smooth singing distortion to full Metal Meltdown.

**OUTPUT (MASTER)** sets the master volume of that channel

**MODEL: Platinum Distortion**

**SERIAL #:** \_\_\_\_\_

**INPUT VOLTAGE: +9v - +12 vdc 2.1 mm center tip ground**
